👍 **Semi VB Decompiler - Source Code + More**

Been about five years since I have done any VB decompiler work so releasing what I have done so far. Has been a great learning experience for me and should help others as well!

Learn about internal VB structure, exe file formats.
Supports VB 4,5,6
vb 2,3 can be supported with the addons.
.Net CLR information, processing streams.
And more!

All I ask if you use is include me in the credits.
Sources work for VB6

Re: Semi VB Decompiler - Source Code + More

I receive a lot of errors when trying to load Semi VB Decompiler in Visual Basic 6.0 I haven't tried the other programs yet.

Re: Semi VB Decompiler - Source Code + More

It does require quite a few ocx controls along with libraries that need to be registered/included in the project.

Re: Semi VB Decompiler - Source Code + More

From what I can tell all the files linked to above belong to one project? If so wouldn't it be better to add those components together in an installation package? That way all the files needed to run the program will be included in the package instead of users having to search for and installing thm manually.

Re: Semi VB Decompiler - Source Code + More

I do have an install program that installs anything but didn't want to include the .exe file there
prjVB3decompiler.ocx is in VB 3 Decompiler OCX

Re: Semi VB Decompiler - Source Code + More

well I read the read me and included all the files need in the directory where I have all the project unzip and the project loads fine with no errors but now when i try to compile it I'm getting errors is there anything else i need to have installed for this to compile?

>
> *thanks*

I will have another look and see if I can figure out how
to get the code working and compiled! Well, the code is
posted in the Visual Basic 6 and earlier code bank so it
should be written in VB6 or earlier. You email was about
something on vbforums I posted the reply here but it
might be use for other using the code.

Edit:

Still not having any luck compiling the decompiler!
After, I try to create the exe on my laptop I receive a
message that SemiVBDecompilerHelper is missing the
funny thing is that the directory that is said to be listed
under is under one named "vb.net" although, that
folder is not included in any of the packages included in
the first post.

You could ask over at the Programming Zone about how
to compile and use the files.

Re: Semi VB Decompiler - Source Code + More

Please remove all compiled code from your
attachments. Instructions in the use of the various
attachments would also be helpful.

Tips, Examples & Tutorials:
A valuable forum tool • Generate unique TreeView keys • TreeView with "open" and

"closed folder" icons • Time code using GetTickCount • How to trap the Tab key •
Scroll a form • NumberBox ActiveX control • Color a ListView row • An InputBox form •
How to use SaveSetting and GetSetting • A program registration scheme • Spellcheck a
Textbox • Resize controls • Open Windows Explorer at Last Visited Path • A Blackjack
Game • Count lines of code • Private Message Viewer • Copy/Paste VB Code • Paste
VB Code Add-In • Insert Procedure Names Add-In • A calculator for the game of
Spider • My review of REALbasic 2008 • VB6 Debug Tutorial • Picture/Video Viewer •
VBF Photo Contest Winners
